Product Introduction

OVERVIEW

- As the new generation of intelligent equipment, LED advertising board (Absen Poster) constitutes a complete advertising broadcast system through terminal software control, network information transmission and multimedia terminal display. It can display pictures, texts, videos, small plug-ins (weather, exchange rate, etc.) and other multimedia materials.
- Compared with traditional print and sticker advertisements, the Poster has a natural advantage – **INTERACTIVITY!**
- With the development of digital signage, the advertising machine, as a new type of media, is growing at a rapid pace. Aiming at office buildings, shopping malls, banks, supermarkets, hotels, exhibition halls, communities, transportation hubs and other public places or crowded areas, the Poster can greatly improve the information delivery.

Corporate

Hotel

Retail

Public Spaces

Transportation Hubs

ADVANTAGES

Ultra Light - Ultra Thin

- At 28kg – the solution is 36% lighter than conventional LCD advertising solutions

High Brightness - Wide Color Gamut

- LED self-illumination, 4 times brightness than LCD and Rear Projection Display System
- 110% NTSC color gamut, wider color range, vivid color performance

ADVANTAGES

Multi Scenario Application

- Single Screen set up can replace a traditional roll-up banner
- Multi-Screen – independent playback
- Multi-Screen – Simultaneous playback
- Multi-Screen – Cascade Playback
- Installation options (kick stand, base, hanging, wall mount...)

Intelligent Cluster Control

- Users can change the content through WIFI or wired connection
- Users can directly control the screen via the available application
- Windows. IOS and Android Compatible
- Networkable
 - Playback
 - Unified management of multiple units
 - Monitor status
 - Content management

SPECIFICATION

PARAMETERS	AP1.8	AP2.4
Pixel Pitch	1.89mm	2.4mm
Panel Dimension	592mm x 1,746mm	592mm x 1,746mm
